

Swachh Mann: Motivating School children for cleaning activities and plantation on 25.3.2019

The NIH under the Swachhta Pakhawada-2019 at St. Joseph Junior School, Roorkee, organized an awareness program for the schoolchildren. The program started with the welcome of chief guest Dr. Ajay Singh, Head of Civil Engineering department, Roorkee Institute of Technology, Roorkee and Dr. Rama Devi Mehta, Ex-Scientist and Director, Kumar Center, Roorkee. Dr. Sharad Jain, Director, NIH educated children about the importance of cleanliness and use of water in day-to-day life. Dr. Ajay Singh gave a talk on the importance of cleanliness, smart city and the role of community in cleanliness. Dr. Rama Devi Mehta made aware about the smart technology for water conservation, self-hygiene, and community hygiene.

A Nukkad natak/skit was performed by the students of St. Joseph Junior School, Roorkee giving the message of cleanliness, importance of toilets and water. Dr. L N Thakural, Nodal officer, Swachh Bharat Mission, also administered a pledge of Swachhta to the audience. The importance of water, methods and technologies of water conservation was also shown to the schoolchildren and teachers through a movie and bioscope.

Moreover, on this occasion fruit plants were also embedded in the campus of the school.
